

AC Line Splitter Model ALS-1

Cat. #2121.05
Current monitoring (X1 and X10), Voltage monitoring
 Provides temporary separation of conductors to facilitate measurement of current. Increases the sensitivity of clamp-on current probes and clamp-on meters. Two clamp positions: X1 for direct readings; X10 for actual reading multiplied by 10. Also features voltage check function.

Cat.#2121.05

Operating Voltages	120VAC – USA Standard Outlet Voltage
Operating Current	15A Max
Current Monitoring	X1 (Direct) ; X10 (High Sensitivity - Direct Multiplied By 10)
Voltage Monitoring	Voltmeter Input Jacks To Measure Line Voltage
