Chauvin Arnoux®, Inc.

August 2018

Dear Customer and/or Distributor:

The State of California PROPOSITION 65 requires the proper labeling of products sold and delivered in California. Proposition 65 is a law to protect drinking water sources from toxic substances. It puts the burden of proof on business instead of government to make determination about safety levels for specific toxic chemicals that may be found in their products.

Chauvin Arnoux Inc. d.b.a. AEMC® Instruments is committed to conducting its business in a socially and ethical manner consistent with applicable national laws and regulations. As part of a business group actively working in Europe, we already meet similar environmental regulations such ROHS and particularly REACH which also addresses many chemical substances contained in PROPOSITION 65.

In response to your inquiry regarding our activities relative to PROPOSITION 65, please be advised of the following:

AEMC® Instruments is fully aware of the regulation and has sought outside assistance from an accredited PROP65 organization in obtaining Safe Use Determinations for our products from OEHHA (Office of Environmental Health Hazard Assessment).

At this time we do not know which products will require the PROPOSITION 65 Label, but we are hoping to know so in the very near future.

Thank you for your understanding and patience.

Should you have any further questions, do not hesitate to e-mail us at Customerservice@aemc.com

A handwritten signature in black ink that reads 'Winthrop D. Smith'.
